

Harlequin Woodspring™

Harlequin Woodspring is a wooden sprung floor system that is a modern update of the traditional 'basket weave' construction. It has a counter batten configuration, comprising a triple layer of custom machined southern yellow pine arranged at right angles. Shock absorption and energy return are enhanced by dual-density elastomer blocks attached at predetermined intervals to the underside. Layers of flexible MDF and plywood panels are installed on the battens which support the chosen Harlequin performance top surface. Harlequin Woodspring is suitable for all genres of dance.

Performance surface: Harlequin Woodspring can be used with a variety of Harlequin performance surface options from the Harlequin range of performance vinyls and solid or engineered wood finishes.

Installation: Harlequin Woodspring can be laid on any smooth flat surface. If a Harlequin vinyl performance floor is chosen, a moisture-resistant suspension board will be included underneath, along with a colour-matched composite edging profile which will be installed around the finished edges. If a solid hardwood or engineered wooden top surface is chosen, the skirting will be optional.
