

Case Study Caribbean Princess

Overview

Princess Cruise Lines, part of Carnival Corporation, invested \$8.2 million in a full renovation programme on the Caribbean Princess.

Measuring 290m, the 113,000 tonne cruise ship entered the Grand Bahama Shipyard for a full makeover.

The ship's Explorers' Lounge underwent a complete stage refurbishment. Showcasing Broadway-style productions at sea, the Princess' theatre is amongst the largest of the ships entertainment venues with state of the art facilities to accommodate elaborate stage sets.

Case Study

Caribbean Princess

The requirement:

Stage refurbishment and new stage surface.

The solution

Harlequin's highly skilled specialist installation team carried out a full replacement of the main stage and laid over 280m² of black Harlequin Cascade vinyl performance surface with adhesive and fully welded seams.

The proscenium arch and centre stage refit included the installation of two layers of plywood; down stage and up stage performer lifts, access panels, demountable sections, Serapid tracks, feather and black paint finish, steel rain trough removal and battening, work on the steelwork grid and bespoke floor guides for the LED wall. Safe edges and nosings were also installed.

Harlequin Cascade

Homogeneous PVC with a slip-resistant dance surface

Mineral fibre reinforcement

Homogeneous PVC
