Case Study Emerald Princess and Grand Princess

The requirement:

Stage refurbishment and new stage surface.

The solution

The main stage refurbishment projects were carried out in conjunction with Stage Technologies Group.

The existing floor coverings were removed and defects in the plywood sub-floors were repaired. A latex screed with flexible smoothing compound was used to give a suitable finish before the installation of the Harlequin vinyl surfaces. In both cases Harlequin Cascade was permanently laid, with seams welded and silicone sealant applied to its perimeters, before PVC nosings were installed to the steps each side of the stage into the audience area.

Harlequin Cascade
