

Harlequin's range of

Ballet Barres

Whether you choose portable freestanding, permanent wall or floor-mounted ballet barres, you'll realise they are almost a prerequisite for the dancer.

Without a comfortable and sturdy barre it is hard to do the essential warm-up and stretching exercises. Both amateurs and professionals can minimise the risk of injury by stretching properly to increase blood-flow to the muscles and improve flexibility whilst achieving an elegant stance.

Professional freestanding portable ballet barres

Home Studio Freestanding ballet barre specification

- Height from floor to top of lower barre - 82cm (32.5")
- Height from floor to upper barre - 105cm (41.5")
- Barre diameter - 4cm (1.5")

- Height from floor to top of lower barre - 82cm (32.5")
- Height from floor to upper barre - 105cm (41.5")
- Barre diameter - 4cm (1.5")
- Total foot depth - 73cm (28.7")
- Adjustable feet for stability on an uneven floor
- Wooden freestanding ballet barres come in an uncoated, natural sanded finish

Large

- Length of barre 360cm (142")
- Approximate weight - 20kg

Freestanding ballet barre extension kit

Harlequin's freestanding portable ballet barre extension kit is constructed from anodised aluminium, with barres having a beech finish. This kit is best suited for use with our large freestanding portable ballet barre, although it can also be used with our medium and small versions.

Single and double wall-mounted brackets & barres

Harlequin's wall-mounted ballet barres feature various shaped mounting plates to suit the design of your studio.

- Brackets are supplied complete with screws and plugs and can be mounted at any height: four fixings for the single bracket and six fixings for the double bracket.
- Recommended height from the floor to the centre of the top of the barre 1052mm (ISTD / RAD recommend between 1020 - 1150 mm).
- Barres are set at 21cm from the wall to the centre of the top of barre. On the double bracket the two wooden barres are spaced 20cm apart.
- Lengths of barre can be joined inside the bracket heads to hide the joins and give the impression of a continuous length of barre. For example, along the entire length of a studio wall.
- Choice of bracket colour: black and grey available as standard, additional colours including, white and metallic to order. Chrome plated also available to order.
- Wooden barre is 5cm (1.9") in diameter and 150cm (59") long. Other lengths available manufactured in beech.
- Wooden barres come in an uncoated, natural sanded finish.

Single brackets

Double brackets

PLEASE NOTE: the wooden barres shown in the pictures are sold separately

Floor-mounted brackets

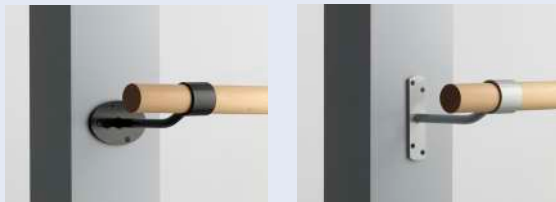

There are many occasions when it is not possible to fix ballet barre brackets onto a wall - perhaps in front of mirrors or where a wall is not suitable to accept fixings. Harlequin's floor mounted ballet barres are designed to be fitted at the same time as the installation of a Harlequin sprung floor, whereby the vertical leg of the barre support is mounted onto the substrate and the sprung floor built around it. These barres can also be mounted onto an existing floor, providing it is not sprung.

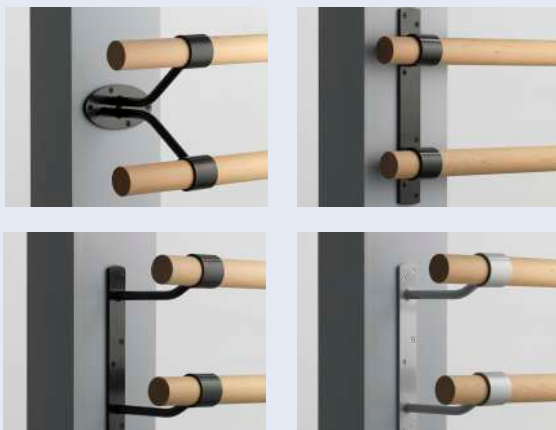

Wall-mounted brackets

We have a wide selection of brackets - choose from single, double, square or oval, with custom bracket designs available to order.

Single brackets

Double brackets

Under window wall-mounted brackets

Custom designed brackets to allow wall barres to be fitted across most windows or obstructions. Available to order.

End brackets

Bracket for the end of a Harlequin wooden ballet barre to an adjacent wall.

PLEASE NOTE: the wooden barres shown in the pictures are sold separately.

Ballet barre corner angle sleeve

Harlequin's ballet barre corner angle sleeve is specifically used to join the ends of two Harlequin pine or beech barres within a corner.
